

The Power of We™

Inbound IVR Call Flow 333 GSM Prepaid

Last updated on: June 14th 2016

Version: 1.6

Version History

Version No / Date	Change Initiated By	Updated By	Summary of Changes
0.01 / Jan.15.2015	-	Karthikeyan G	Initial draft of the call flow
0.02 / Jan.20.2015	RCOM	Karthikeyan G	Updated call flow based on the discussion with Mona and Amit.
0.03 / Jan.21.2015	RCOM	Karthikeyan G	Maintaining separate call flow for 333 GSM. Incorporated changes as discussed with Mona.
0.04 / Feb.2.2015	RCOM	Daranivasan.A	Incorporated changes based on response provided - Included Host detail notes - Verbiages change in Menu/Phrases but flow logic remains the same - New Global Menu with no Transfer Agent inserted - Amex card pay removed
0.05 / Feb.15.2015	RCOM	Daranivasan.A	- Start(STT) * Removed LTV Phase 1 and Pase 2 checks as per feedback * Included Hotflash - Language Selection(LSE) * Instead of flow continuing to invoked position, diverted it to Intelligent Layer - Preferred Service Check(PSC) * Removed - Intelligent Layer(INL) * Preferred Service Check included - Account Information(ACI) * Calling Intelligent Layer altered - Main Account Balance & Validity(MABV) * Zero or expiry check condition - Responses Provided * Voice Offers(VCO) & Data Offers(DTO) * Pay Using Core Balance(PCB) * Process Payment(PRP)
0.06 / Feb.17.2015	RCOM	Raajesh Kumar	Transfer Agent *SRC counter 5/8/15 will be common for both 333 and 198
0.07 / Feb.19.2015	Reliance	Daranivasan.A	- VAS(VAS) & Internet & VAS(INV) * Replace "transfer to other IVRs" with message followed by Global Prompt
0.08 / Mar.05.2015	Servion	Daranivasan.A Karthikeyan.G	Added IVR DB interface details
0.09 / Mar.24.2015	Servion	Karthikeyan.G	1. Activate VAS – added interface to fetch the available vas and activate vas. 2. Transfer back to main menu 3. Process payment changes .. PACE interface to validate card details and process payment 4. Top-up interface added to validate the entered denomination 5. Global prompt to be played for second and third try for all menus but only for HNI callers 6. Intelligent layer moved upfront of the call instead under each main menu and logics updated for SR, CRM interaction history, tariff change, pack renewal 7. PUSH SMS: SMS will only be triggered from URL but not by CSS. 8. GPRS settings: CSS will communicate to device manager and device manger will send the GPRS settings to MDN. Device manager will be responsible for sending SMS and maintaining the SMS text 9. Buy offer or pack: No need to collect MRP through admin, instead ACT <offer code> will be passed to consumer BUY PACK interface. Option to enter the activation code against each offer in admin to be included; which will be sent to MACD / pay using core balance interface 10. Voice offer / data offers: added OFU interface to get OFU offers 11. Added interface for my pack and plan Credit card entry call flow: Removed card selection menu and one card number entry collection menu

Version History Contd

Version No / Date	Change Initiated By	Updated By	Summary of Changes
1.1 / April.8.2015	-	Karthikeyan G	Base lined version
1.11 / April.17.2015	-	Karthikeyan G	1. Added Interface to pack renewal 2. Voice and data offers: offer code (instead of activation code) will be passed to buy the pack interface 3. Data Balance & Validity: removed FRC balance category, since that is not applicable for GSM and added interface details to fetch Data balance. 4. My Plan & Pack: Added interface details to retrieve my plan and pack details. 5. Pay using core balance: Added interface. Error codes pending. Process payment: Payment or transaction ID will be played only if the interface returns payment ID, otherwise transaction id phrase will not be played.

1.6 / June.14.2016	-	Yahya Rayyan	Updated circle based voice offers and data offers providing three of them to the caller.

Standard Call Flow Conventions

This shape represents the Start or End of the IVR Application

This shape represents speech announcements with out caller input

This shape represents any process that happens in the background

This shape represents the Menu option, the same shape also represents the collection of a string of digits (prompt and collect option).

This shape represents the host or database access.

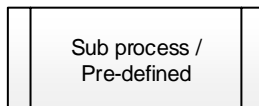

This shape represents a condition on which a decision is made to chose a branch in the call flow. It can be based on the input provided by the caller or the result from some external processor (a database operation).

This shape is a page connector which means the continuation of the flow in the same page.

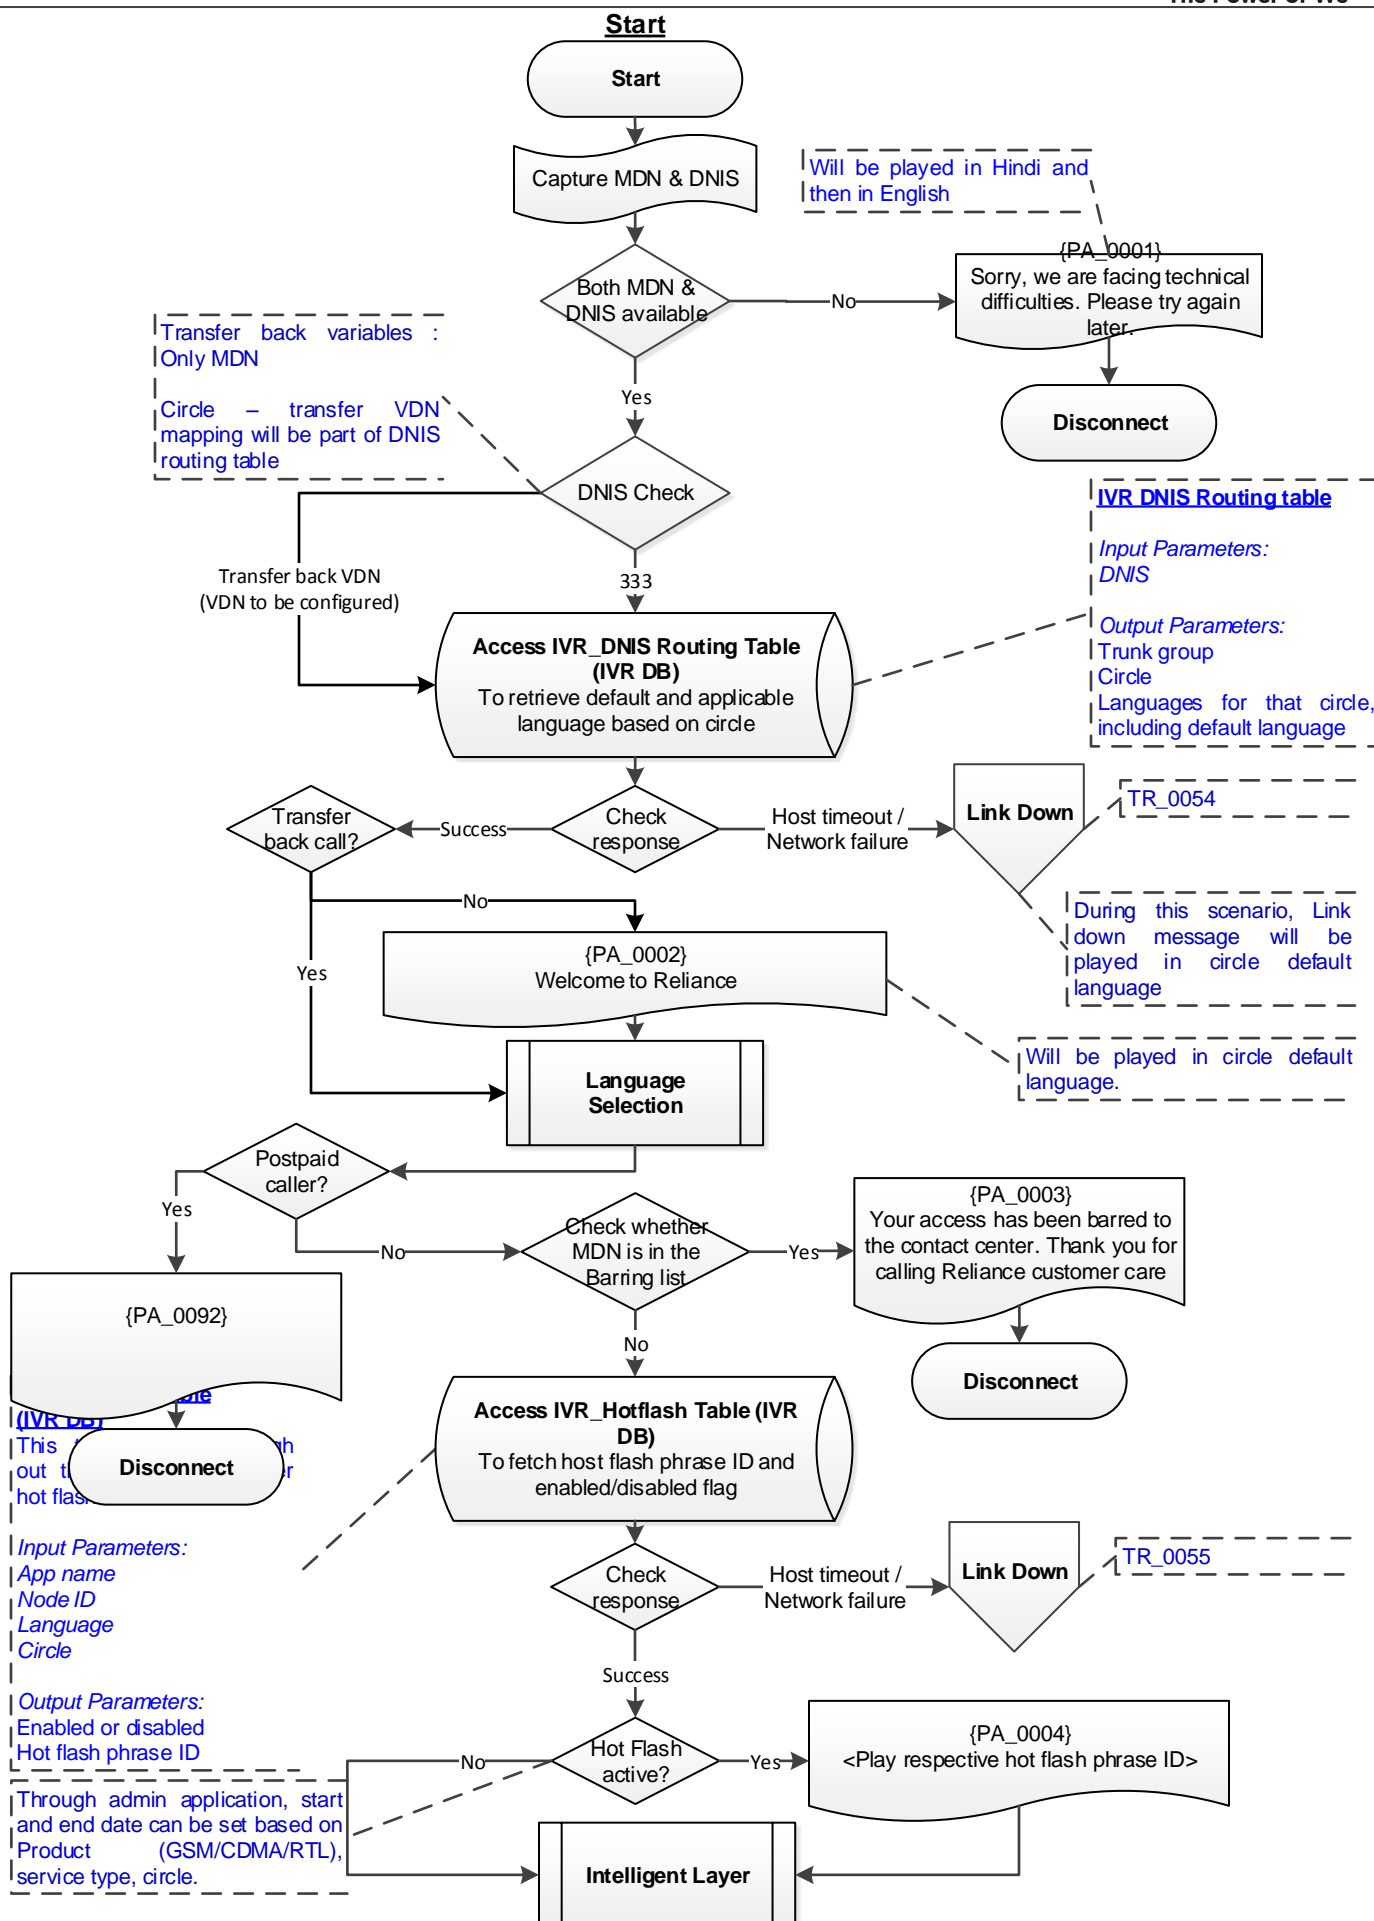

This shape is a page connector which means the continuation of the flow is in another page.

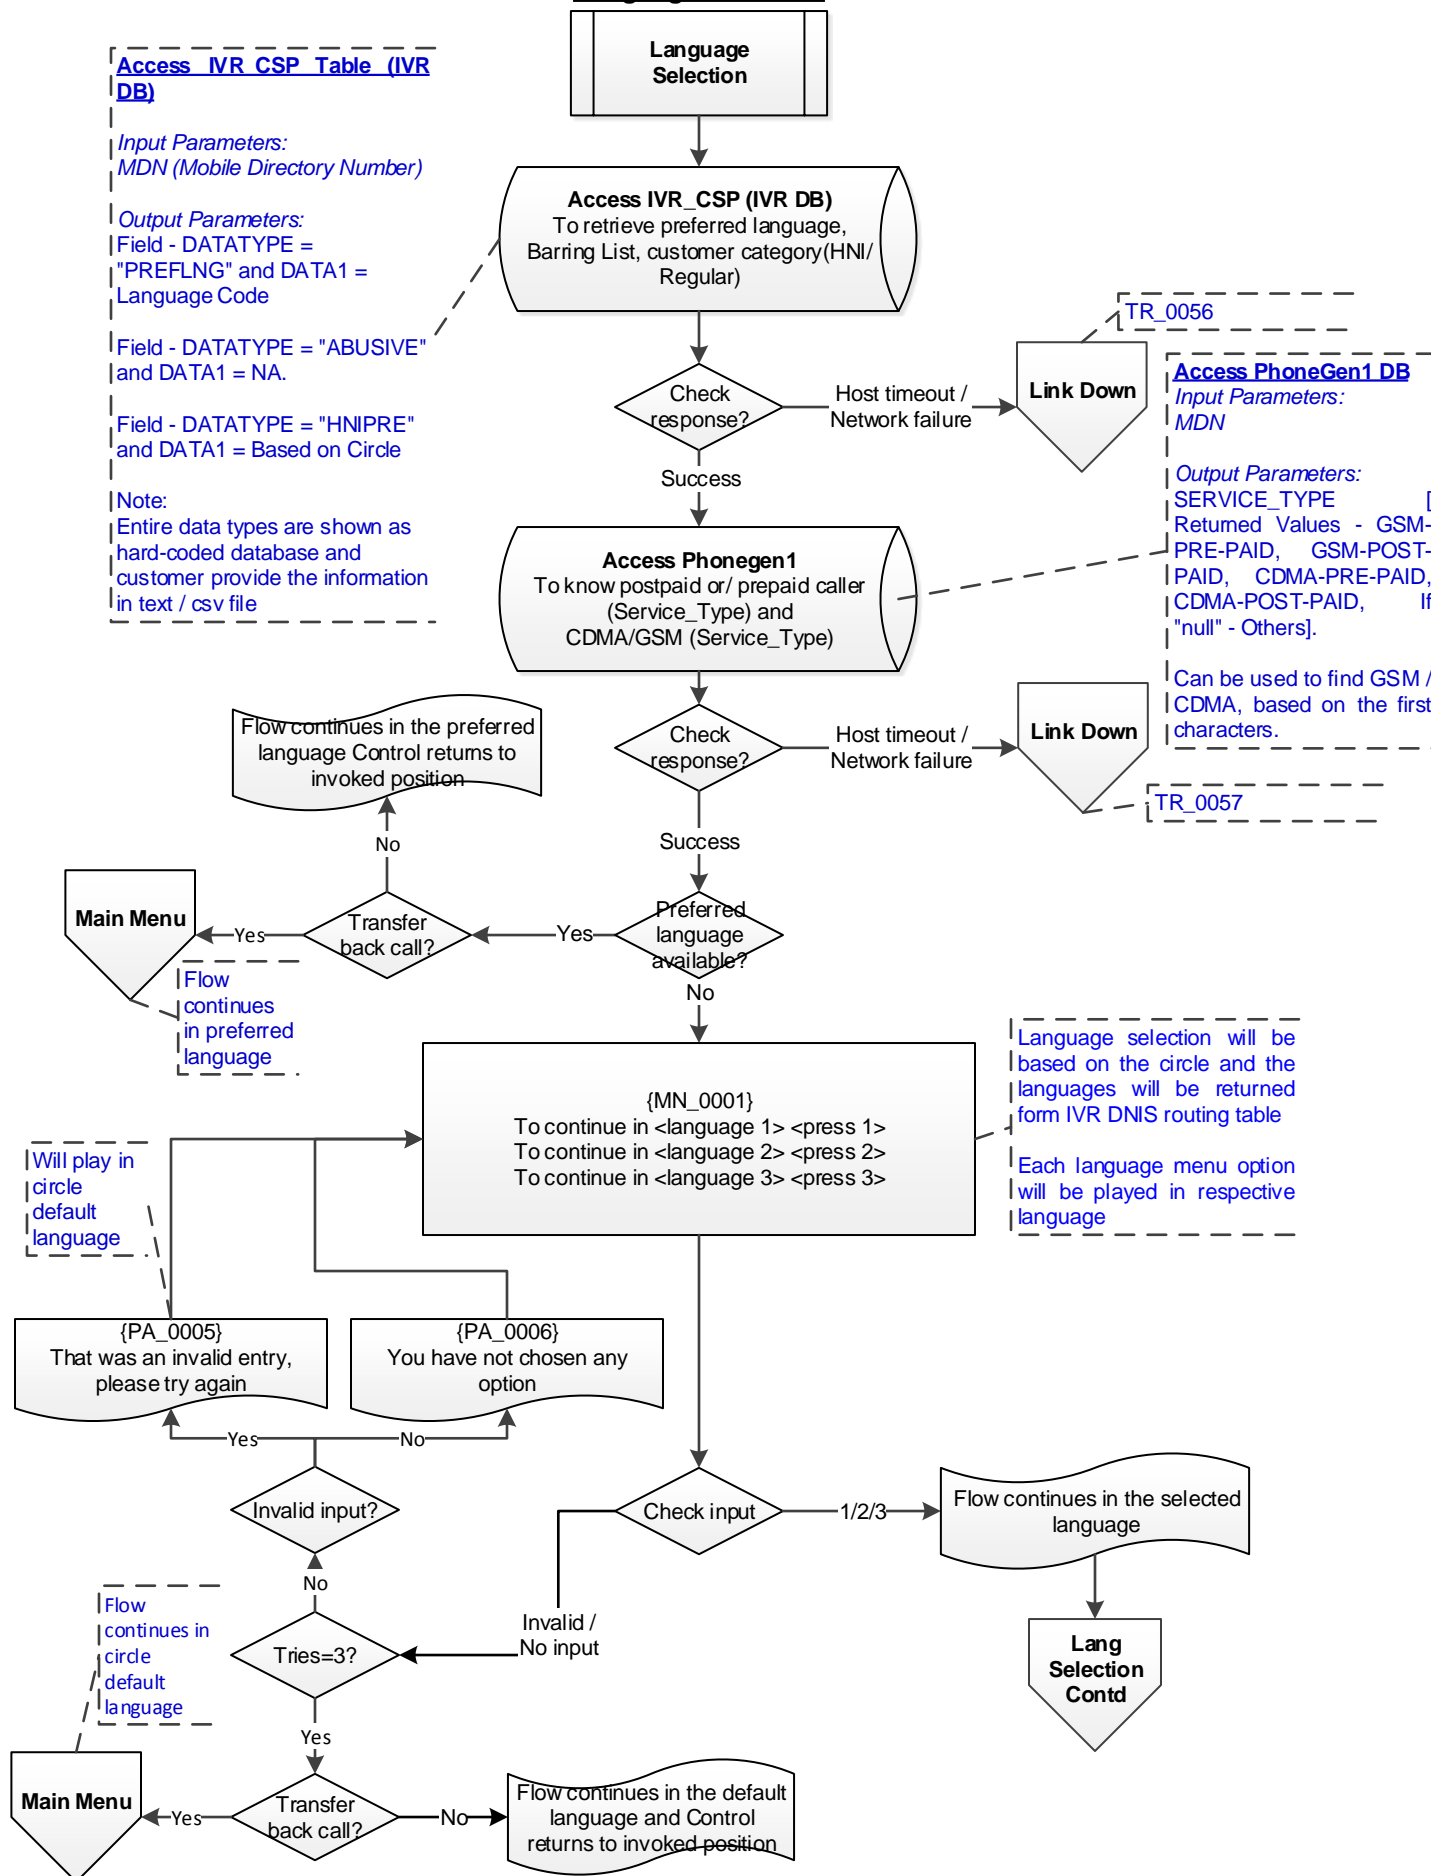

This shape is used for a process that has already been defined elsewhere. This indicates that there is another flowchart available for this predefined process, and should reference that source for more information. Typically is used to simplify complex flowcharts by moving a large part of the flowchart to another flowchart.

Universal Business Rules

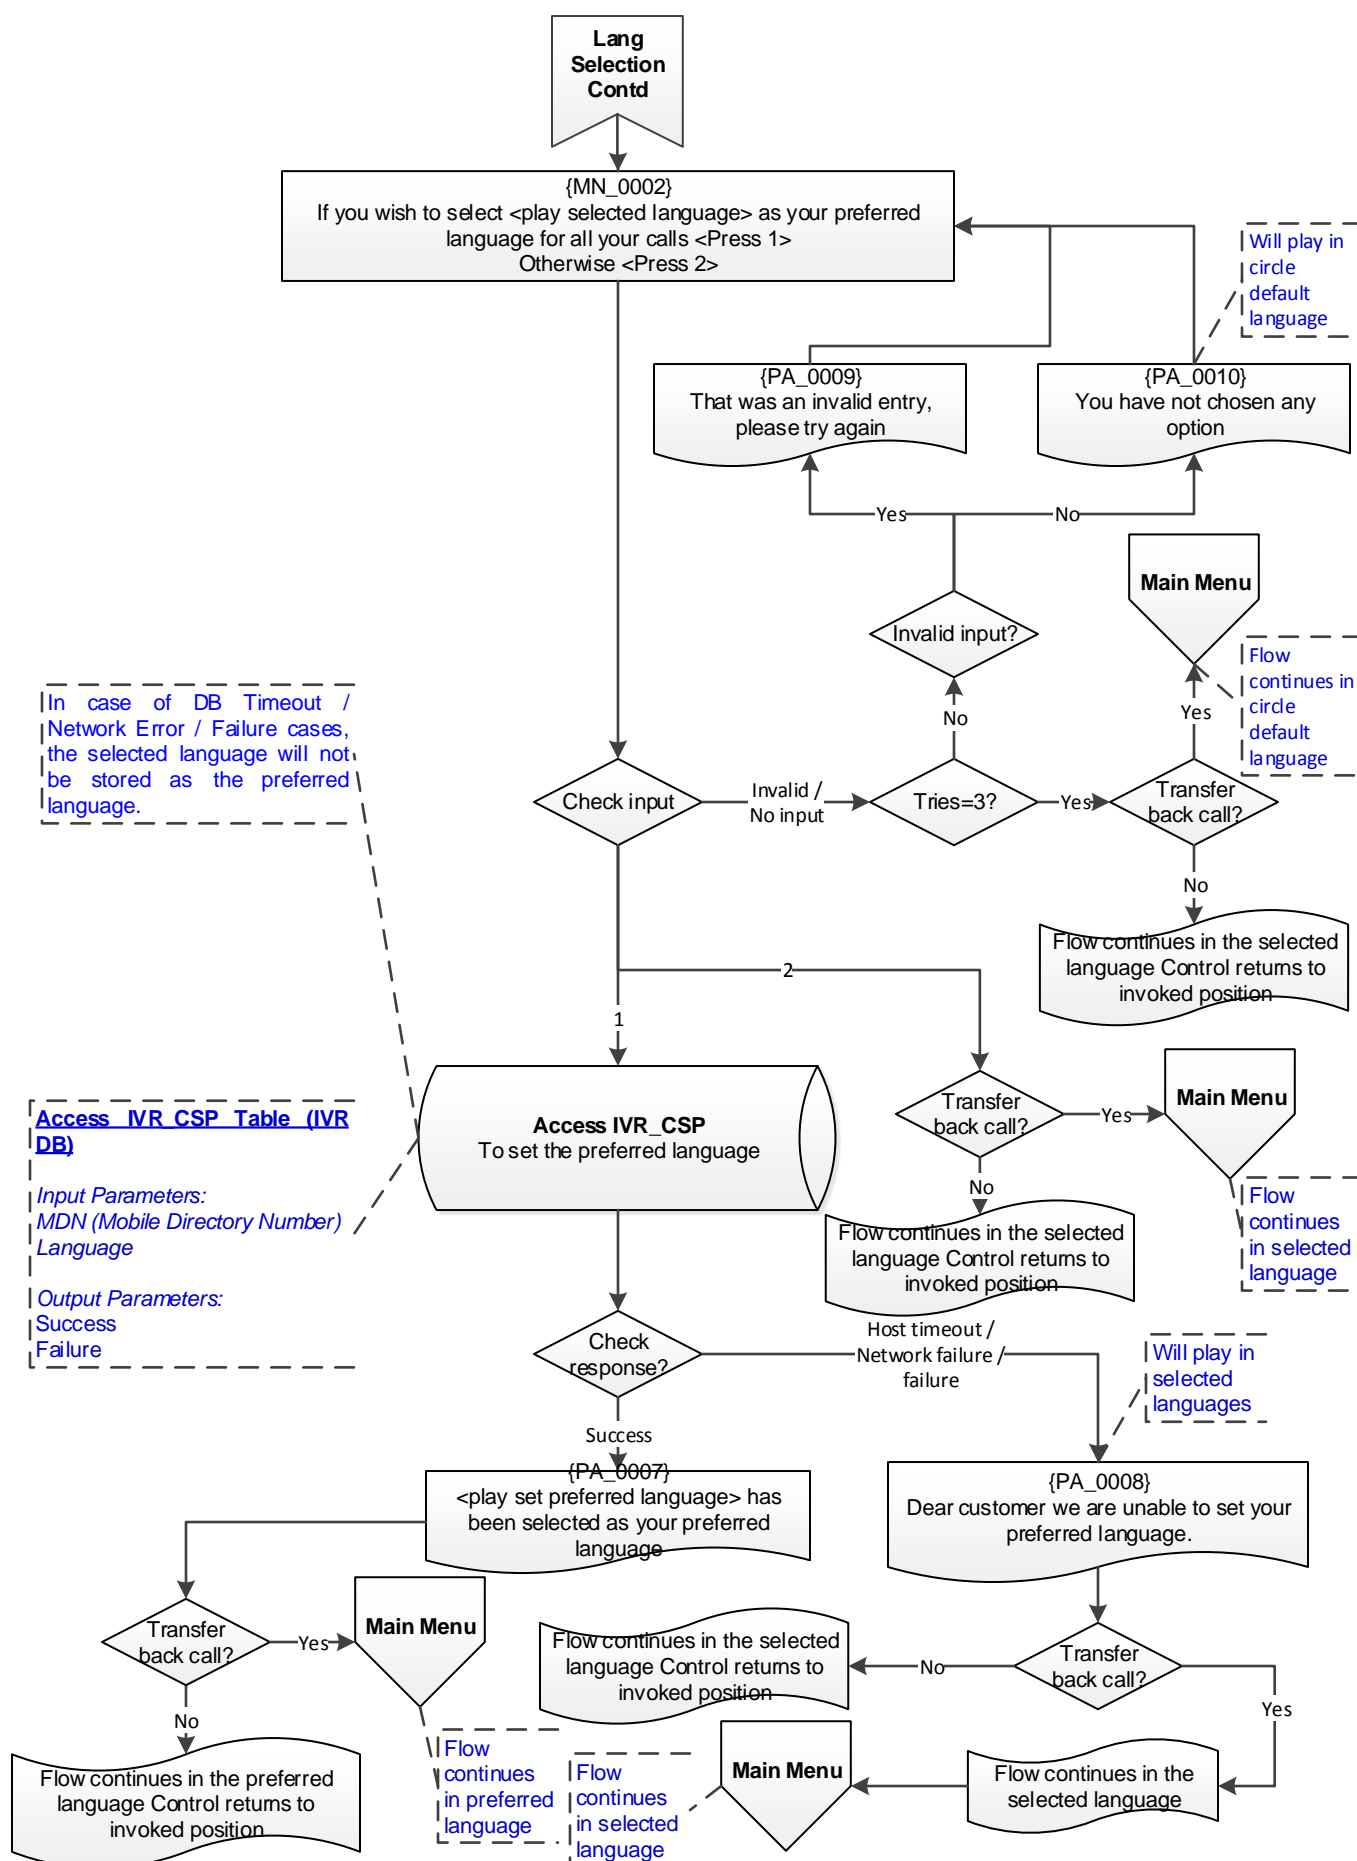

S.No.	Functionality	Description	Exceptions
1	Call Center Business Hours	24x7	
2	Language of Interaction	English, Hindi, Marathi, Punjabi, Telugu, Kannada, Malayalam, Tamil, Gujarati, Oriya, Bengali	Language selection will be dynamically offered based on the circle Default language will vary for each circle as provided in the "RCOM Circle Mapping 2" sheet
