

RCOM 1299 IVR Call Flow CDMA 4G Post Registration Flow

Document Created on: April 12th 2016
Prepared By: Yahya Rayyan

Version: 1.0

Version History

Version No / Date	Change Initiated By	Update By	Summary of Change
1.0/Apr.12.2016	Rajesh Manjalkar	Yahya Rayyan	Initial draft of the call flow
	▲		

Start / Disconnect

This shape represents the Start or End of the IVR Application

Audio prompt

This shape represents speech announcements with out caller input

Process

This shape represents any process that happens in the background

Prompt and Collect

This shape represents the Menu option, the same shape also represents the collection of a string of digits (prompt and collect option).

DB/Host access

This shape represents the host or database access.

Decision

This shape represents a condition on which a decision is made to chose a branch in the call flow. It can be based on the input provided by the caller or the result from some external processor (a database operation).

On Page
Reference

This shape is a page connector which means the continuation of the flow in the same page.

Off Page
reference

This shape is a page connector which means the continuation of the flow is in another page.

Continuation
of Off Page
reference

This shape is a page connector which means the continuation of the flow is in another page.

Sub process /
Pre-defined

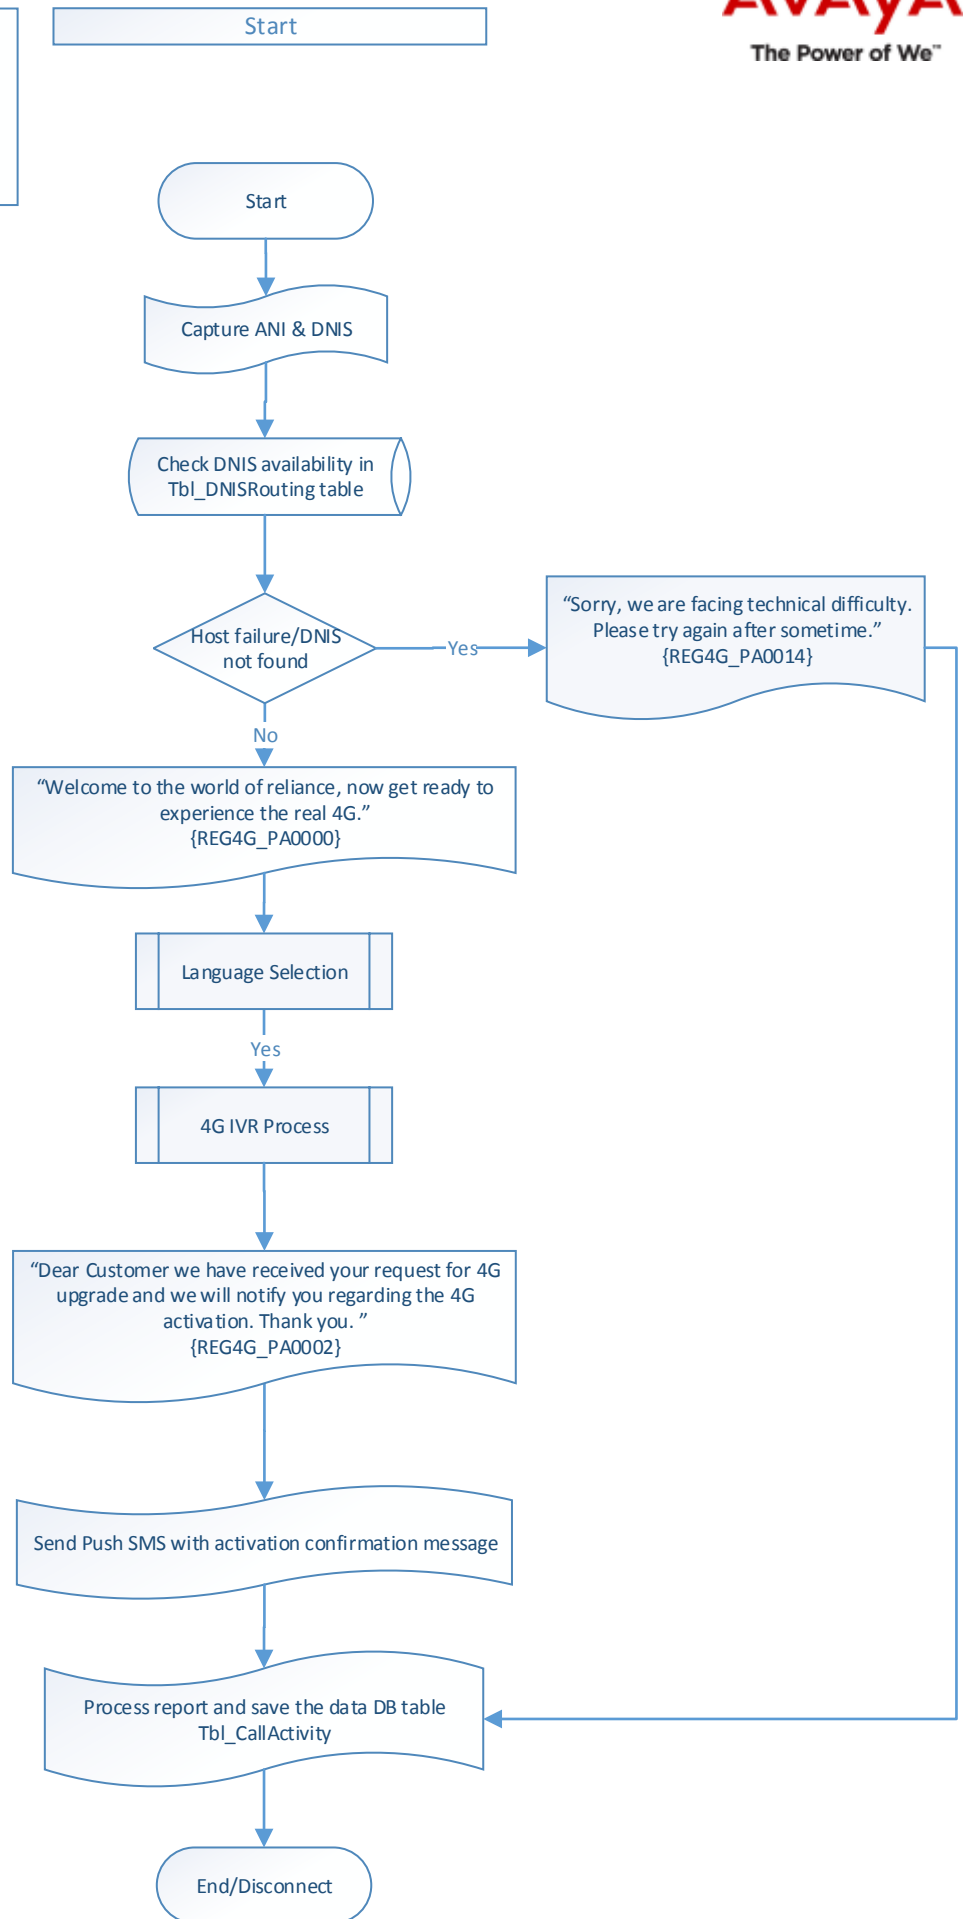

This shape is used for a process that has already been defined elsewhere. This indicates that there is another flowchart available for this predefined process, and should reference that source for more information. Typically is used to simplify complex flowcharts by moving a large part of the flowchart to another flowchart.
